KINETIC WATER RAM

SIMPLE TO OPERATE...Anyone can use it.

1 Pump up

2 Insert in drain

3 Snap trigger

Opens clogged sinks, closets and pipes. Designed to handle any stoppage and clean out rust, corrosion, grease, sediment and scale in waste lines up to 4", supply lines and hot water coils. Cleans stoppages up to 1200' from point of use. Great for the far side of drum traps or a series of tight bends.

How the Kinetic Water Ram works

Uses compressed air which swiftly strikes the water in the blocked pipe. A small shot from the Ram delivers enough force to clear and clean the line.

Safe to use on all pipes - even plastic

Kinetic energy is 98% forward and only 2% generated against the side walls of the pipe. Other pressure systems exert equal force on all sides of the pipe.

Simple to Use

Rugged Construction

16 ga. chrome plated brass cylinder tested to 6000 lbs pressure, 160 lb... gearless pressure gauge. High quality self-contained air compressor. Check valve prevents kickback of water into hose. Standard 1/2" pipe thread nozzle, can be pushed up or down.
